PRE-CONFERENCE WORKSHOP

(separate registration required)

Workshop 1**13:00 h 'How to BEGIN with a good idea for a clinical research project, and END with useful data to dazzle your colleagues!'**

Gary Gaddis

In this presentation, Dr. Gaddis will present an idea for a potential clinical research project which is not complex, which is feasible to complete in an emergency department setting, and which should be of interest to the audience. He will discuss how to translate a general idea into a publishable research project, highlighting important steps that must be completed. Dr. Gaddis will spend substantial time discussing important research design issues and statistical issues that may stand between a good idea for a research project, and the obtaining of data that can be the basis of a publishable manuscript of interest to many emergency physicians.

Workshop 2**09:30 h Professioneel presenteren**Mascha de Ridder
(Dutch spoken)

Presenteren voor een groot publiek is een vak apart. Hoe houdt u de aandacht vast? Hoe houdt u het boeiend? Waar laat u uw handen en hoe beheerst u uw zenuwen? Tijdens de cursus 'Professioneel presenteren' krijgt u antwoord op al deze vragen én uw eigen vragen. Persoonlijke oefening en feedback zijn gegarandeerd.

Doel/resultaat

U leert professioneel presenteren.
Aantrekkelijk, helder en publiekgericht.

Inhoud

Mondeling presenteren leert u vooral door het veel te doen. De cursus biedt dan ook volop tijd om te oefenen. Iedereen bereidt thuis een presentatie van 10 minuten voor. Tijdens de training wordt u opgenomen op video. Gedurende de nabespreking krijgt u feedback op wat effectief was en wat verbeterd kan worden. De video bevestigt deze feedback. Het programma wordt samengesteld aan de hand van individuele leerwensen van de deelnemers. Onderwerpen die aan de orde komen, of waaruit een keuze gemaakt kan worden, zijn:

- Voorbereiden van een presentatie
- Opbouw van een presentatie
- Omgaan met spreekangst/zenuwen
- Taalgebruik en non-verbale aspecten
- Omgaan met interactie
- Omgaan met hulpmiddelen (overhead projector/ beamer/flip-over)
- Boeiend presenteren
- Omgaan met weerstand/reageren op moeilijke vragen
- Houding en stemgebruik
- Presenteren met korte voorbereidingstijd
