Pre-conference workshop (separate registration required)

Subject: Emergency ultrasound

11:00 h **The FAST-exam, the basics**

Alice Tang

17:00 h End of program

Have you added the power of FAST to your skill set? FAST is Focused Assessment with Sonography for Trauma – a fast, accurate, noninvasive diagnostic imaging test that can be performed on any trauma patient. The 20,000+ subjects in clinical trials and the 200+ associated journal articles attest to one simple fact: Some patients cannot live without it!

This intensive ‘hands-on/how-to’ course will help to prepare you to perform and to interpret bedside ultrasonography and will bring you one step closer to acquiring your official FAST certificate.
